

ACE^{econ}

ELIMINATE PASSES

AMMANN

ARR 1575

ELIMINATE GUESSWORK WITH ACE^{econ}

ACE^{econ} is the light equipment version of Ammann Compaction Expert (ACE), a proprietary intelligent compaction system.

Like its counterparts used on Ammann heavy and light rollers, ACE^{econ} provides operators with information that results in cost savings.

Without ACE^{econ}, the operator must estimate the compaction level. If the operator overestimates compaction, he might depart prematurely and leave unfinished work behind. This can lead to quality control issues and costly rework.

Productivity and profits also can be lost if the operator underestimates the progress and continues to work after compaction has been achieved. This miscalculation leads to wasted labor and fuel, and also puts unnecessary hours on the machine.

“ACE^{econ} measures compaction progress in real time and communicates that information to the operator via an LED display on top of the machine.”

APPLICATIONS

- Pipeline construction
- Social and industrial development areas
- Structure backfill work
- Confined work spaces
- Airport construction
- Elec. Cable construction
- Dumpsite construction
- Subbase of roads
