

AMMANN

Ammann in brief

Productivity Partnership for a Lifetime

“Closer to you through global presence – Ammann is strengthening its

position as a global provider of highly productive, ecological, safe and reliable machinery and plant for road construction. We are continuously expanding our international presence through new regional representative offices and adapting to local markets by introducing new machines. ‘Productivity Partnership for a Lifetime’ is our slogan and also our promise to you. We live up to this through reliable products, customer proximity and a personalised after-sales service.”

Hans-Christian Schneider, CEO and member of the Ammann Group Board of Directors

Family-owned business in the sixth generation

Ammann is a leading global supplier of mixing plants, machines and services to the construction industry, with core expertise in road building. Hans-Christian Schneider took over the helm of the Ammann Group in January 2013 as a representative of the sixth generation of the entrepreneurial family. His appointment represents the natural continuation of the Swiss family’s long-standing tradition as entrepreneurs: independence, sustainability and credibility remain the underlying values – quality, the ability to innovate and customer orientation determine the company line. Ammann is the perfect partner for long-term cooperation.

“Productivity Partnership for a Lifetime”

... for more than 140 years. Jakob Ammann established his own mill construction workshop in Switzerland in 1869. Driven by a pioneering spirit, the first owner of the company and his subsequent successors have continuously expanded both the customer base and the product range.

Market-driven solutions offer prospects

Ammann continuously increases customer benefit and, as a result, its share of core markets through an improved range of services and new, optimised products. In Latin America, South and Central Africa, Southeast Asia, China and India, the company aims to become the ideal partner for every customer by continuously adapting its products to the needs of the markets and by establishing regional subsidiaries to provide outstanding customer service.

There is currently a high demand for modern and environmentally friendly technology. Every new product development pursues ambitious goals with regard to the environment, safety and emission reduction – with a focus on economic benefits to the customer and ecological benefits for the environment. Ammann’s customers can rely on a strong and healthy brand that can hold its ground and continue to improve both products and services even in difficult times.

Road construction is subject to increasingly stricter emission directives. The proportion of reclaimed asphalt used in production is growing due to the rising cost of raw materials. Ammann has adopted a global and dependable approach to meet these challenges.

Additional information on products and services is available at

Road-mobile, semi-mobile and stationary asphalt mixing plants for the highest demands and lowest operating costs. The company has produced top-quality asphalt since 1908. The plants produce between 80 and 400 tonnes per hour non-stop, either in continuous or batch production mode depending on requirements.

Complete range of compaction machines – from rammers to various types of vibratory plates to tandem rollers, single drum rollers, pneumatic tyred rollers and trench rollers. More than 100 years of experience and continuous innovation in the field of compaction guarantee the best customer benefits.

High-performance asphalt pavers with wheels or tracks. Ammann pavers produce a high-quality asphalt finish even in tight spaces thanks to outstanding manoeuvrability.

An extensive service and after-sales care, ambitious and demanding retrofit projects and the localisation of the as1 control software in 25 languages are just a few examples to demonstrate that Ammann is clearly focused on individual customer requirements.
