

LET'S CONSTRUCT YOUR OFF-SEASON PLAN

While there are many busy months ahead of you, now is the ideal time to prepare for the next off-season.

THE PLANNING

Ammann team members can expertly assess your plant now – while it's working – and highlight key improvement opportunities. Once you select the upgrades, our team will work with you to develop a custom renovation plan. When the off-season arrives, you'll be ready for quick upgrades with no disruption to your daily operations.

THE PIECES

Amdurit and retrofits are 2 key pieces to your plant's cost-savings plans. Amdurit, Ammann's wear-protection system, can be applied to components that face the most wear and tear. It provides 3 times the life of wear-resistant steel and dramatically extends life.

- **Retrofits include opportunities to modernise key components, expand plant capabilities and upgrade the operating system.**
- **We can make this process easy for you, so don't wait.**
- **Now is the time to build a plan and put the pieces in place.**
- **For additional information please contact your local Ammann service specialist!**
- **Construction made easy by Ammann.**

ARE YOU CONSIDERING A RETROFIT PROJECT ON YOUR ASPHALT MIXING PLANT, OR A RETROFITTING OF YOUR PLANT WITH AMDURIT® COMPONENTS IN THE NEXT OFFSEASON?

GET IN TOUCH WITH YOUR LOCAL AMMANN SERVICE SPECIALIST ON TIME AND WE WILL SUPPORT YOU WITH OUR EXPERTISE IN THE PLANING AND REALISATION OF YOUR PROJECT.

GUARANTED DELIVERY OF ALL REQUESTED COMPONENTS FOR YOUR NEXT OFFSEASON.
